

Medi-Kool 2.0 Unit

Medi-Kool 2.0 Unit
MK20

The Mermaid Medi-Kool 2.0 unit, "MK20", is an ideal addition to any ambulance, fire truck, or emergency response vehicle where climate controlled drugs are necessary. The model is constructed out of high grade injected molded white plastic and is controlled by the same high end circuit board that allows for heating and cooling of the contents on the Medi-Kool MK15 and MK747.

A polished stainless steel

unit now **AVAILABLE!!!** Click [here](#) for more details!!!!

The MK20 is designed to work off the vehicles 12-volt power supply. The product not only maintains desired set temperature ranges, it also stores the data for approximately 6-7 months worth of material! The MK20 is available with the option of the compressor unit on the left, right, or behind the unit, as well as the option of having the hinge of the door be on the left or right. Each MK20 is also provided with the security of a stainless steel lock! The MK20 uses R-134a refrigerant and is a "sealed" system requiring NO charging. Simply install in a compartment, provide 12-volts to the unit, quick connect the control board, and you are up and running! Products are available through your manufacturer or Mermaid direct!

Be sure to choose the model of your choice below. Here are a few examples:

1. MK20-COMP-R-L = Medi-Kool MK20 with the Compressor on the Right and Hinge on the Left.
2. MK20-COMP-L-R = Medi-Kool MK20 with the Compressor on the Left and Hinge on the Right.

Additional discounts apply for volume purchases.

Price \$1,295.00

Climate Controlled Rx Cabinet
