

MEDI-KOOL 747 UNIT

MEDI-KOOL 747 UNIT
MK747

Mermaid's second largest model, the "MK747" is designed to hold at least one Pelican or 747 Rx box. This beautiful unit is a "built-in" model designed to work of the truck's 12-volt power supply. This unit will do what the MK15 and MK20 units do - Cool AND Heat!

NEED SLIGHTLY LARGER? SEE THE NEW MK747-EXT MODEL!

***** Looking for REFRIGERATION ONLY? Visit your Medi-Kool unit of choice! *****

The Mermaid "747" is designed for any ambulance, fire truck, or emergency response vehicle where cooling or heating the entire medical box or bag is necessary. The "747" can hold at least one Pelican or 747 box and will maintain the pre-set temperature using the climate controlled circuit board that comes standard with the unit! The board will not only provide cooling and heating based on your desired temperature range, but it will also store your pre-set ranges and monitor them for up to 6 months!

The "747" cabinet can be built with the hinge on the left or hinge on the right. The compressor can be mounted on the back, left, or right of the unit. Proper ventilation is required for this, and all Medi-Kool units. For security, Mermaid includes a stainless steel lock with each unit!

Ensure to select Hinge on the Left or Hinge on the Right and your preferred compressor location. See items below.

As stated above, the standard unit will Cool AND Heat. Should you require ONLY a refrigeration unit, we can honor this for only \$400 less than the price below! Contact us for any additional information or to order one today! - info@mmair.com.

Additional discounts apply for volume purchases.

Price \$0.00

Ideal for Ambulances, Fire Trucks, or any other Emergency Response Vehicle!
