

KC-2 Kool-Chest

KC-2 Kool-Chest
KC-2

The Kool-Chest portable refrigerator/freezer is well suited for the marine environment, whether is it mounted under the pedestal seat of a center console or in the galley of a sailing yacht. Mermaid utilized R-134a refrigerant and provides a one-year warranty on the product.

Mermaid's Stainless Steel KC-1 Kool-Chests

The cooler/freezer is thermostatically controlled to your preference of either refrigerator or freezer activity. Eliminate the hassles of limited supply and storage of ice!

Mermaid's Kool-Chest will

keep your perishables cool or frozen! For you fisherman, we have found this to be ideal for fish and bait storage! The 12/24v model machines will have a two speed option control. The low speed is designed for a slower cooling time, yet more efficient. The high speed mode is designed for rapid cooling, yet less efficient. Typically, high speed is used to cool a "warm" chest and low speed is used for the rest of the requested cooling time. The 12/24V product utilizes the highly recognized and durable Danfoss BD-50 compressors.

Please allow 2-3 weeks for production on the KC-2 Unit.

Price \$1,350.00

Designed to Cool or Deep Freeze. Themostatically Controlled.

Dimensions:

KC-2 = 19" W x 21" H x 34" L

Power Consumption:

12/24v = 5.1 amps low speed, 9.0 amps high speed

110v = 2.27 amps

220v = 1.14 amps
