

Plastic Air Grills/Registers

Plastic Air Grills/Registers
PG Grills

These recent additions to the Mermaid line allow the boat owners looking for a nicer grill that the standard aluminum grills and are unable to use our wood framed grills. The "PG" Supply Air Grill lines and Return Air Grill Lines are manufactured out of high grade plastic with built in louvers and a mounting flange for a simple and clean installation. These make an excellent addition to vessels looking for an upgraded vent appearance.

The supply and return air grill sizes can be selected below. The measurements are for the CUT-OUT and an additional 3/4" needs to be considered all the way around the grill for the mounting flange. Current stocked items are below. Others are available by contacting our factory.

Plastic Supply and Return Air Grills

Very nice upgrade from the standard aluminum grills where wood vents would also not work. The Supply Air Vents are equipped with adjustable louvers. The Return Air Vents are a fixed louver.
